

android::os::AsyncTask
< String, Void, Void >

Context

mContext

org.buildmlearn.toolkit.matchtemplate.data.
FetchXMLTask

```
classDiagram
    class AsyncTask["android::os::AsyncTask<String, Void, Void>"]
    class Context
    class FetchXMLTask["org.buildmlearn.toolkit.matchtemplate.data.FetchXMLTask"]
    AsyncTask <|-- FetchXMLTask
    FetchXMLTask ..> Context : mContext
```

The diagram illustrates the relationship between three classes. At the bottom is a grey-shaded box representing the class `org.buildmlearn.toolkit.matchtemplate.data.FetchXMLTask`. A solid blue arrow points from this box to a white box above it labeled `android::os::AsyncTask < String, Void, Void >`, indicating inheritance. Another dashed purple arrow points from the same bottom box to a white box to the right labeled `Context`, with the label `mContext` placed next to the arrow, indicating an association.
